DETAILED ACTION

Allowable Subject Matter

1. Claims 22-33 allowed, subject to the Examiner's Amendment described below.

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. The claims have been rewritten in the style of a "Beauregard claim", which is considered statutory under 35 USC 101 (see MPEP 2106.01,I). Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.
3. Authorization for this examiner's amendment was given via telephone by Gary Cohen (Reg. No. 33,127) on 1/25/2010.
4. The application has been amended as follows:

Claims 1-21 (Cancelled)

Claim 22 (New) A computer-readable medium tangibly embodying computer-executable instructions which when executed by a computer processor perform a customer satisfaction method comprising the steps of:

automatically sending, according to a predetermined schedule, open-ended queries to customers as to whether the customers have any problems with goods or services provided by a provider that have not been resolved to each customer's satisfaction, wherein a query includes a user interface for receiving open-ended responses input from the customers;

receiving responses from customers to the queries;

analyzing responses from customers to identify a customer problem;

transmitting the identified customer problem to a problem solver for resolution;

receiving a solution to the identified customer problem from the problem solver;

transmitting the solution to the customer; and

sending a query to the customer requesting verification that the problem has been solved;

wherein the method first identifies a problem by analyzing a customer response to an open-ended query, solves the identified problem, and then has the customer verify that the identified problem has been solved.

Claim 23 (New) The computer-readable medium of claim 22, further comprising instructions for storing a copy of each query sent, response received, problem identified, and solution generated.

Claim 24 (New) The computer-readable medium of claim 23, further comprising instructions for generating a report of queries sent, responses received, problems identified, and solutions generated.

Claim 25 (New) The computer-readable medium of claim 22, wherein queries are sent via e-mail and responses are received via e-mail.

Claim 26 (New) The computer-readable medium of claim 22, further comprising instructions for analyzing customer responses with a pattern recognition system.

Claim 27 (New) The computer-readable medium of claim 23, further comprising instructions for problem reporting and maintaining a customer relationship management database.

Claim 28 (New) The computer-readable medium of claim 26, further comprising instructions for storing a record of customer queries, customer responses, customer problems and solutions.

Claim 29 (New) The computer-readable medium of claim 22, wherein the predetermined schedule comprises once a month.

Claim 30 (New) The computer-readable medium of claim 22, wherein the predetermined schedule comprises once a week.

Claim 31 (New) The computer-readable medium of claim 22, wherein the identified customer problem is closed responsive to receiving a response from the customer verifying that the problem has been solved to the customer's satisfaction.

Claim 32 (New) The computer-readable medium of claim 22, wherein a new customer problem is opened responsive to receiving a response from the customer that the problem has not been solved.

Claim 33 (New) The computer-readable medium of claim 25, wherein an email query includes a yes link for enabling a customer to respond in the affirmative to the query as to whether the customer has any problems with goods or services provided by a provider that have not been resolved to the customer's satisfaction and a no link for enabling a customer to respond in the negative, wherein responsive to selection of the yes link, the system displays an interface for receiving input from the customer describing the problem that has not been resolved to the customer's satisfaction.

Reasons for Allowance

5. The following is an examiner's statement of reasons for allowance:
6. The closest prior art the Examiner has been able to locate is Remedy (as evidenced by Newswire ("Remedy Introduces New Applications to the Customer Relationship Management (CRM) Market") and Strauss ("My remedy what!? Has been resolved???")). Remedy discloses a customer satisfaction system wherein a customer may open a ticket in order to have a problem solved. While Remedy and the instant invention are similar in many respects, there are patentable distinctions.
7. Remedy discloses a tracking system for computer support problems. Remedy is reflective of typical customer support models in that it waits for a customer complaint and then follows the complaint with problem solving. Remedy can only track those job tickets/service requests the customers have input into the system. In contrast, Applicant's invention identifies more problems than a tracking system which relies entirely on customer initiated problems. Applicant's invention automatically sends open-ended queries to customers as to whether the customer has any problems with goods or services provided by a provider that have not been resolved to the customer's satisfaction. Unlike Remedy, a customer does not have to have already opened a ticket for service to receive the query. These open-ended queries enable the earlier detection of problems, thus increasing customer satisfaction.
8. The following is a formal statement of reasons for allowance:
9. Claim 22 is allowed because the best prior art of record, Remedy, does not disclose or fairly suggest the limitations in a computer-readable medium tangibly embodying computer-

executable instructions which when executed by a computer processor perform a customer satisfaction method comprising the steps of:

automatically sending, according to a predetermined schedule, open-ended queries to customers as to whether the customers have any problems with goods or services provided by a provider that have not been resolved to each customer's satisfaction, wherein a query includes a user interface for receiving open-ended responses input from the customers;

receiving responses from customers to the queries;

analyzing responses from customers to identify a customer problem;

transmitting the identified customer problem to a problem solver for resolution;

receiving a solution to the identified customer problem from the problem solver;

transmitting the solution to the customer; and

sending a query to the customer requesting verification that the problem has been solved;

wherein the method first identifies a problem by analyzing a customer response to an open-ended query, solves the identified problem, and then has the customer verify that the identified problem has been solved.

10. Claims 23-33 are allowed at least by virtue of their dependence on allowed claim 22.

11. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
